ROBERT R. RINGWOOD
LEGISLATIVE AUDITOR

September 13, 1984

The Legislative Audit Committee
of the Montana State Legislature:

Enclosed is the report on the audit of the Board of Investments for
the year ended June 30, 1984.

The audit was conducted by Giblin, Riggs and Associates, Certified
Public Accountants under a contract between the firm and our
office. The comments and recommendations contained in this report
represent the views of the firm and not necessarily the Legislative
Auditor.

The agency's written response to the report recommendations is
included in the back of the audit report.

Respectfully submitted,

Handwritten signature of Robert R. Ringwood in cursive script.
Robert R. Ringwood
Legislative Auditor

STATE OF MONTANA BOARD OF INVESTMENTS
OVERVIEW OF AUDIT

Our examination of the financial statements of the State of Montana Board of Investments was conducted primarily to enable us to render an opinion as to the fairness of their presentation. Included in this report are our opinions on the June 30, 1984 financial statements expressed in our auditors' reports dated September 12, 1984. Included with our examination are specific audit procedures performed, as required by the Montana Legislative Auditor. They consist of the following:

1. A review of the state laws applicable to the Board of Investments and any Federal regulations that might apply, to determine the Board's compliance therewith.
2. Physical examination of all securities held by the Treasurer's office at June 30, 1984 and to confirm with the holding institution those securities held in safekeeping.
3. Confirm with the servicing institution the outstanding balances for all mortgages and SBA loans owned at June 30, 1984.
4. Examine all mortgages and related documents at specified servicing agency locations.
5. Test the accuracy of individual securities listed in the portfolio.
6. Test Short-Term Investment Pool transactions to determine compliance with established guidelines for operation of the pool.
7. Examine minutes of the monthly Board of Investment meetings.

Our auditors' report on the 1984 All Other Funds financial statements is qualified because, in our opinion, the deferral of gains and losses on bond swaps is not in accordance with generally accepted accounting principles. The Board has followed the practice of deferring bond swap gains and losses in prior years, but not until the year ended June 30, 1981 did the dollar amount involved become significant. This was due mainly to a substantial increase in bond swapping activity because of advantageous market conditions. The bond swapping activity has continued during 1984 and is considered material to the financial statements.

Included in this report under the title "Memorandum of Suggested Improvements in Accounting Procedure and System of Internal Control" are items that came to our attention during the course of our audit (including a recommendation relative to bond swap gains and losses) that should be considered by the Board. These items were considered by us during our examination; however, they do not modify the opinions expressed in our auditors reports. The Board's actions relating to these suggestions should result in improved procedures and controls in future periods.

DENNIS R. RIGGS, CPA

OPINION OF CERTIFIED PUBLIC ACCOUNTANTS

To the Legislative Audit Committee
of the Montana State Legislature:

We have examined the statements of investments managed by the State of Montana Board of Investments All Other Funds as of June 30, 1984 and 1983, and the related statements of investment income and changes in investments managed for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

The State of Montana Board of Investments All Other Funds follows the practice of deferring losses incurred on bond swaps and amortizing those losses over future periods. (See Note 2 to the financial statements). In our opinion, generally accepted accounting principles require that bond swap losses be recognized in the year incurred for all agencies, except for Public Retirement Systems where it is acceptable to defer losses on bond swaps.

In our opinion, except for the effect upon the 1984 and 1983 financial statements of deferring losses on bond swaps as discussed in the preceeding paragraph, the financial statements referred to above present fairly the investments managed by the State of Montana Board of Investments All Other Funds as of June 30, 1984 and 1983, and its investment income and the change in its investments managed for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

Our examinations have been made for the purpose of forming an opinion on the basic financial statements taken as a whole. The portfolio information as of June 30, 1984 (Appendix A), and the schedule of investment income by fund (Schedule 1), are presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the examination of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

STATE OF MONTANA BOARD OF INVESTMENTS
ALL OTHER FUNDS
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 1984

1. HISTORY AND ORGANIZATION

The State of Montana Board of Investments (the Board) was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The investments and the income therefrom are owned by various State of Montana agency funds and managed on their behalf by the Board.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Investments

Investments, except mortgages, are presented in the statement of investments managed at book value (original cost adjusted for discount and premium amortization where applicable). Mortgages are presented in the statement of investments managed at par value. Mortgage discounts are recorded in the accounting records of the applicable administering agencies. Current values for publicly traded securities are determined primarily by reference to market prices supplied to the Board by various brokerage houses. Unrealized market loss on investments managed increased by \$144,115,216 in 1984 and decreased by \$154,293,917 in 1983. The investments managed relate principally to investments which will be held to maturity or otherwise disposed of at no significant loss to the fund.

Premium and discounts are amortized using the straight-line method over the life of the securities. An average life of eight years is used for amortization of mortgage discounts.

Bond Swaps

Bond swaps involve trading one security for another security having the same par value for the purpose of enhancing portfolio content and/or yield. The Board defers gains and losses resulting from bond swaps and amortizes such gains and losses over the shorter of either the remaining life of the bonds sold or the replacement bonds purchased. As shown in the accompanying financial statements the accumulated net unamortized deferred losses on bond swaps as of June 30, 1984 and 1983 and the net amortization of the deferred losses on bonds swaps for the years then ended were as follows:

	<u>June 30, 1984</u>	<u>June 30, 1983</u>
Accumulated net unamortized losses on bond swaps:		
Agencies other than public retirement systems	\$ 16,663,734	\$ 15,142,406
Public Retirement Systems	<u>28,030,834</u>	<u>24,100,484</u>
Total	<u>\$ 44,694,568</u>	<u>\$ 39,242,890</u>

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

	<u>June 30, 1984</u>	<u>June 30, 1983</u>
Net amortization of deferred losses on bond swaps:		
Agencies other than		
Public Retirement Systems	\$ 1,225,736	\$ 1,513,670
Public Retirement Systems	<u>2,161,356</u>	<u>2,001,802</u>
Total	<u>\$ 3,387,092</u>	<u>\$ 3,515,472</u>

3. INVESTMENTS NOT UNDER DIRECT CONTROL

Land and buildings, the cost of which are also included in investments managed in the accompanying financial statements, are not under direct control of the Board. The agencies administering these assets maintain control and provide the Board with the necessary financial information. Rental income from these buildings is included in the statement of investment income; however, occupancy and depreciation charges relating to the buildings are not material and have not been included in the statement of investment income.

The book value of land and buildings included in the investments managed in the accompanying financial statement was \$274,544 at June 30, 1984 and \$283,347 at June 30, 1983.

4. SECURITIES LENDING

The Board has an agreement with Manufacturers Hanover Trust Company (Manufacturers) whereby Manufacturers would loan to other entities securities managed by the Board. During the period the securities are on loan, the Board receives a fee and Manufacturers must maintain collateral equal to 102% of the market value of the securities loaned. The Board retains all rights and risks of ownership during the loan period. Included in interest income in the accompanying financial statements is \$219,164 for the year ended June 30, 1984 and \$233,304 for the year ended June 30, 1983 of income from securities lending activities. At June 30, 1984 approximately \$59,114,000 and at June 30, 1983 approximately \$4,300,000 of securities included in these financial statements had been leased by Manufacturers to other entities.

OPINION OF CERTIFIED PUBLIC ACCOUNTANTS

To the Legislative Audit Committee
of the Montana State Legislature

We have examined the statements of investments managed by the State of Montana Board of Investments Short-Term Investment Pool as of June 30, 1984 and 1983, and the related statements of investment income and distributions and changes in investments managed for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the Investments managed by the State of Montana Board of Investments Short-Term Investment Pool as of June 30, 1984 and 1983, and its investment income and distributions and changes in its investments managed for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

Our examinations have been made for the purpose of forming an opinion on the basic financial statements taken as a whole. The portfolio information as of June 30, 1984 (Appendix A), and the schedule of investment income by fund (Schedule 1), are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the examination of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Net asset value, End of Year	<u>\$ 223,009,849</u>	<u>\$ 243,775,573</u>

The accompanying notes are an integral part
 of these financial statements.

STATE OF MONTANA BOARD OF INVESTMENTS
SHORT-TERM INVESTMENT POOL
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 1984

1. HISTORY AND ORGANIZATION

The State of Montana Board of Investments (Board) was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Short-Term Investment Pool (STIP) provides a short-term investment vehicle to participants (state and local governmental units) with a relatively small amount to invest. Investment in STIP affords the participant liquidity and a return on their investment. The investments and the income of STIP are owned by the participants as they purchase units and are managed on their behalf by the Board.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Administrative Expenses

Administrative expenses incurred by the Board are charged to STIP daily based on the Board's expenses applicable to STIP.

Income Distribution

The value of units purchased or sold includes a daily computation of net asset value and income; therefore, income to point of sale is included in proceeds to the seller. Cash distributions of income are made to continuing participants on the last working day of the months of May and November. The amounts shown for value of units purchased and sold by participants are net of income purchased and income sold, respectively.

Money Max System

The Board utilizes an automated system (Money Max) for STIP accounting. Money Max automatically accrues investment income and expenses, computes unit values, etc., on an individual fund basis. Current values for investments are determined by Money Max through direct computer access from a New York securities valuation firm. Investments are presented in the statements of investments managed at current value. The value of investments managed is adjusted daily for changes in the current value.

3. SECURITIES LENDING

The Board has an agreement with Manufacturers Hanover Trust Company (Manufacturers) whereby Manufacturers would loan to other entities securities managed by the Board. During the period the securities are on loan, the Board receives a fee and Manufacturers must maintain collateral equal to 102% of the market value of the securities loaned. The Board retains all

rights and risks of ownership during the loan period. Included in interest income in the accompanying financial statements is \$95,148 for the year ended June 30, 1984 and \$66,036 for the year ended June 30, 1983 of income from securities lending activities. At June 30, 1984 approximately \$31,148,312 and at June 30, 1983 approximately \$5,216,613 of securities included in these financial statements had been loaned by Manufacturers to other entities.

OPINION OF CERTIFIED PUBLIC ACCOUNTANTS

To the Legislative Audit Committee
of the Montana State Legislature

We have examined the statements of investments managed by the State of Montana Board of Investments Montana Common Stock Pool as of June 30, 1984 and 1983, and the related statements of investment income and distributions and changes in investments managed for the years then ended. Our examinations were made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the investments managed by the State of Montana Board of Investments Montana Common Stock Pool as of June 30, 1984 and 1983, and its investment income and distributions and changes in its investments managed for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

Our examinations have been made for the purpose of forming an opinion on the basic financial statements taken as a whole. The portfolio information as of June 30, 1984 (Appendix A), and the schedule of investment income by fund (Schedule 1), are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the examination of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

STATE OF MONTANA BOARD OF INVESTMENTS
MONTANA COMMON STOCK POOL
NOTES TO FINANCIAL STATEMENTS
JUNE 30, 1984

1. HISTORY AND ORGANIZATION

The State of Montana Board of Investments (Board) was created by an act of the Legislature to invest and manage the State of Montana's investment funds on a centralized basis. The Montana Common Stock Pool (Mont-Comp) was created in order to allow smaller retirement funds the opportunity to participate in the equity market via a diversified pool.

Mont-Comp was created as of July 1, 1980 by the transfer from all other funds to Mont-Comp of all common stock owned by the Public Employees' Retirement System and the Teachers' Retirement System.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Public Employees' Retirement System and the Teachers' Retirement System transferred virtually all stock owned into Mont-Comp at the start-up date and were issued units according to the market value of their contribution, retaining their original total cost basis.

The initial unit value as of July 1, 1980 was \$1,000. Unit values thereafter are calculated once a month at the close of the last business day of the month based upon the market value of the Mont-Comp equity holdings and other assets. Participants may only buy or sell units on the first business day of each month.

Mont-Comp distributes to each participant investment income on the last day of each month. This distribution is based on the full accrual basis so that all dividends and interest accrued during the month are returned to the participants based on the number of their units outstanding.

3. SECURITIES LENDING

The Board has an agreement with Manufacturers Hanover Trust Company (Manufacturers) whereby Manufacturers would loan to other entities securities managed by the Board. During the period the securities are on loan, the Board receives a fee and Manufacturers must maintain collateral equal to 102% of the market value of the securities loaned. The Board retains all rights and risks of ownership during the loan period. Included in interest income in the accompanying financial statements is \$27,233 for the year ended June 30, 1984 and \$59,682 for the year ended June 30, 1983 of income from securities lending activities. At June 30, 1984 approximately \$8,369,954 and at June 30, 1983 approximately \$79,633 of securities included in these financial statements had been loaned by Manufacturers to other entities.

JAMES M. GIBLIN, CPA
DENNIS E. RIGGS, CPA

To the Legislative Audit Committee
of the Montana State Legislature

We have examined the financial statements of the State of Montana Board of Investments for the year ended June 30, 1984, and have issued our report thereon dated September 12, 1984.

As part of our examination, we made a study and evaluation of the Board's system of internal accounting control to the extent we considered necessary to evaluate the system as required by generally accepted auditing standards. The purpose of our study and evaluation was to determine the nature, timing and extent of the auditing procedures necessary for expressing an opinion on the Board's financial statements. Our study and evaluation was more limited than would be necessary to express an opinion on the system of internal accounting control taken as a whole.

The management of the Board is responsible for establishing and maintaining a system of internal accounting control. In fulfilling this responsibility, estimates and judgements by management are required to assess the expected benefits and related costs of control procedures. The objectives of a system are to provide management with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and that transactions are executed in accordance with management's authorization and recorded properly to permit the preparation of financial statements in accordance with generally accepted accounting principles.

Because of inherent limitations in any system of internal accounting control, errors or irregularities may nevertheless occur and not be detected. Also, projection of any evaluation of the system to future periods is subject to the risk that procedures may become inadequate because of changes in conditions or that the degree of compliance with the procedures may deteriorate.

Our study and evaluation made for the limited purpose described in the first paragraph would not necessarily disclose all material weaknesses in the system. Accordingly, we do not express an opinion on the system of internal accounting control of the Board, taken as a whole. However, our study and evaluation disclosed no condition that we believed to be a material weakness. We do include in the following memorandum comments and suggestions which we do not consider to be material internal control weaknesses; however, they came to our attention during the course of our examination of the financial statements. These comments are offered as

constructive suggestions for the consideration of management as part of the ongoing process of improving accounting control and other financial and administrative practices and procedures.

This report is intended solely for the use of management and the legislature and should not be used for any other purpose. This restriction as to use is not intended to limit the distribution of this document which, upon acceptance by the Legislative Audit Committee, is a matter of public record.

DEFERRAL OF BOND SWAP GAINS/LOSSES

Bond swaps involve trading fixed income securities, such as bonds, debentures and mortgages, for other fixed income securities having the same par value for the purpose of enhancing portfolio content, but primarily to improve yield. Because of increasing interest rates in current years, the market value of older securities has declined. As a result of this current market condition, this exchange of securities often gives rise to a loss on disposal of the older security.

There are currently two ways of accounting for gains and losses on exchanges of debt securities. One method is known as the completed transaction method which recognizes the gain or loss on a sale of a security at the time of the sale. The other method is the deferral and amortization method which recognizes a deferred gain or loss at the time of the sale and amortizes the deferral over the remaining life of the new (or old) bond.

The Board uses the deferral method and amortizes gains and losses over the shorter of either the remaining life of the bonds sold or the replacement bonds purchased. The Board uses the deferral method on bond swaps because it is their belief that the recording of these losses in the financial statements of the participating funds would seriously affect these funds' ability to distribute their income and provide benefits and service. The Board also feels no sale should be recognized since the affect of the sale and repurchase of securities leaves the fund in essentially the same position as before. Individuals who support the deferral method argue that, should the completed transaction method of accounting be required under all circumstances, including those meeting the exchange criteria, many investment managers would be deterred from making exchanges which would otherwise improve investment yields.

At this time, the deferral method of recording gains and losses on bond swaps is not in accordance with generally accepted accounting principles except for use by entities such as public employees' retirement systems, where these gains and losses may be deferred if they meet the exchange criteria. Other state and local government entities are required to use the completed transaction method if they wish to comply with generally accepted accounting principles.

RECOMMENDATIONS

The Board should use generally accepted accounting principles in relation to the accounting of bond swap gains and losses. We realize that the Board wants to maintain consistent accounting records and that they have been using the deferral method for over ten years. Although this desire to maintain consistency is extremely important, in this case, the deferral method is not in agreement with generally accepted accounting principles

RECOMMENDATIONS (CONTINUED)

and its continued use may lend to future qualified opinions if the deferred gains or losses are material to the financial statements taken as a whole. In this regard, the Board may wish to continue the use of the deferral method at least long enough to see if the new Government Accounting Standards Board will study the deferral method as it relates to entities such as the Board of Investments.

We also recommend that the Board provide information with respect to bond swap gains and losses to the various agencies and the Legislative Auditor, if requested. This would enable the various agencies to adjust their financial statements so that they would be in accordance with generally accepted accounting principles.

MANAGEMENT COMMENTS

Since the majority of the long-term funds are retirement funds and to provide consistent accounting, we believe the deferral method is justified.

Also, all information with respect to bond swaps is available to each respective agency.

PHYSICAL EXAMINATION OF MORTGAGES

Our examination of mortgages consisted of a review of all mortgage loan files and the related supporting documentation which were held by servicing agencies for the Board of Investments. This examination was conducted at the servicing agencies indicated by the State Legislative Auditors 1984 rotation schedule. This year we reviewed loan files and the supporting documentation for approximately \$22,700,000 of the \$99,754,418 of mortgage loans.

Details of all exceptions noted were furnished to the Board at the end of our examination. The exceptions which had not been cleared at that time consisted of the following:

- 6 original assignments to the proper fund of the State of Montana could not be located
- 1 loan file had no evidence of current insurance

RECOMMENDATIONS

We recommend that the Board and the servicing agencies continue to follow up on the above noted exceptions to complete their mortgage loan files.

MANAGEMENT COMMENTS

All of the exceptions have been corrected.

MORTGAGE LOAN FILES

The servicers of mortgage loan files are required to hold the loan files in their bank. During our examination of mortgage loan files we found 20 files that were held in a different city than the servicing bank.

RECOMMENDATION

We recommend that if the servicing of loans is transferred to a different bank, that the loan files also be transferred. This would allow the new servicing bank to have all of the information needed to properly service the loan.

MANAGEMENT COMMENTS

We concur.

SECURITIES IN SAFEKEEPING

The physical custody of most of the securities are held in custodial accounts at a bank in New York. Securities listed in the Portfolio Management System (PMS) are to be reconciled monthly to the Statement of Assets provided by the bank each month.

We received a confirmation from the bank and compared it to the securities listed in the PMS as of June 30, 1984. Although we did not note any significant differences, we did note some items which had to be reconciled as of June 30, 1984 which dated back several months.

RECOMMENDATIONS

We recommend that any differences be reconciled by the Treasurers' Office throughout the year between the Portfolio Management System (PMS) and the Statement of Assets provided by the Bank in New York.

MANAGEMENT COMMENTS

The recommendation should be directed to the Treasurers' Office.

NEW ACCOUNTING SYSTEM

The Board will be converting to a different computerized accounting system during the current year. As the Board is already aware, it almost always takes a considerable amount of start up time before the new system becomes fully operational and reliable.

RECOMMENDATIONS

The Board plans to continue to operate this current system as a parallel system until such time as the new computer system is fully operational and working without errors. We want to emphasize the importance of doing the above.

MANAGEMENT COMMENTS

We concur.

BOARD OF INVESTMENTS
PRIOR YEAR RECOMMENDATIONS

The State of Montana Board of Investments is in substantial compliance with the recommendations discussed in the 1983 audit report with the exception of the deferral of gains and losses on bond swaps, which is further discussed under the current year recommendation.

Colorado Springs, CO 80909

Dear Sirs:

The following is our response to your recommendations in regards to our financial audit:

DEFERRAL OF BOND SWAP GAINS/LOSSES

Since the majority of the long-term funds are retirement funds and to provide consistent accounting, we believe the deferral method is justified.

Also, all information with respect to bond swaps is available to each respective agency.

PHYSICAL EXAMINATION OF MORTGAGES

All of the exceptions have been corrected.

MORTGAGE LOAN FILES

We concur

SECURITIES IN SAFEKEEPING

The recommendation should be directed to the Treasurers' Office.

NEW ACCOUNTING SYSTEM

We concur

Sincerely,

A handwritten signature in dark ink, appearing to read "James R. Howeth".
James R. Howeth
Investment Officer
